

Nano Server und Containers

Rinon Belegu

Agenda

- Nano Server
 - Warum
 - Grundlagen
 - Microsoft Server Journey
 - Installation und Management
- Container
 - Grundlagen
 - Docker Verwaltung
 - Uebungen

Warum Nano Server?

- Reboots reduzieren
- Server images zu gross für Serverrollen
- Grundinfrastruktur benötigt zu viele Ressourcen

Security

modern applications

Nano Server
Just Enough OS

Nano Server Einsatzgebiete

- Compute Deployment
 - Hyper-V
 - Storage Server
 - DNS Server
 - Web-Server
 - Container

Installation - Möglichkeiten

- Deployment
 - VHD auf Hyper-V Host
 - VHD auf Physical Server (Boot VHD)
 - WIM Deployment auf Physical Server
- Images erstellen mit PowerShell
- Images erstellen mit Nano Server Image Builder (ADK)

Installation

- Setup Files auf Server 2016 Installationsmedium

Name	Date modified	Type	Size
boot	12.09.2016 14:19	File folder	
efi	12.09.2016 14:19	File folder	
NanoServer	12.09.2016 14:19	File folder	
sources	12.09.2016 14:19	File folder	
support	12.09.2016 14:19	File folder	
autorun.inf	12.09.2016 14:19	Setup Information	1 KB
bootmgr	12.09.2016 14:19	File	378 KB
bootmgr.efi	12.09.2016 14:19	EFI File	1 142 KB
setup.exe	12.09.2016 14:19	Application	79 KB

Installation – Server Rolle und Features

```
en-US
Microsoft-NanoServer-Compute-Package.cab
Microsoft-NanoServer-Containers-Package.cab
Microsoft-NanoServer-DCB-Package.cab
Microsoft-NanoServer-Defender-Package.cab
Microsoft-NanoServer-DNS-Package.cab
Microsoft-NanoServer-DSC-Package.cab
Microsoft-NanoServer-FailoverCluster-Package.cab
Microsoft-NanoServer-Guest-Package.cab
Microsoft-NanoServer-Host-Package.cab
Microsoft-NanoServer-IIS-Package.cab
Microsoft-NanoServer-OEM-Drivers-Package.cab
Microsoft-NanoServer-SCVMM-Compute-Package.cab
Microsoft-NanoServer-SCVMM-Package.cab
Microsoft-NanoServer-SecureStartup-Package.cab
Microsoft-NanoServer-ShieldedVM-Package.cab
Microsoft-NanoServer-SoftwareInventoryLogging-Package.cab
Microsoft-NanoServer-Storage-Package.cab
```

Installation – Quick Start

- PowerShell Module und Scripts includiert in NanoServer\NanoServerImageGenerator
 - NanoServerImageGenerator.psm1
 - NanoServerImageGenerator.psd1
 - Convert-WindowsImage.ps1
- Cmdlets
 - New-NanoServerImage
 - Edit-NanoServerImage
 - Get-NanoServerPackage
 - Get-NanoServerOptionalFeature

Configuration Setting	New-Nano ServerImage Switch
Drivers for physical hardware or VM	[-DriverPath <string[]>]
Administrator password	-AdministratorPassword <securestring>
Deployment Type	[-DeploymentType] {Host Guest}
Edition	[-Edition] {Standard Datacenter}
Add server roles or features	[-Package <string[]>]
Computer name	[-ComputerName <string>]
IP address	[-InterfaceNameOrIndex <string>] [-Ipv6Address <string>] [-Ipv6Dns <string[]>] [-Ipv4Address <string>] [-Ipv4SubnetMask <string>] [-Ipv4Gateway <string>] [-Ipv4Dns <string[]>]
Domain join	[-DomainName <string>] [-DomainBlobPath <string>] [-ReuseDomainNode]
VHD/VHDX size	[-MaxSize <uint64>]
Unattend and/or Setupcomplete	[-UnattendPath <string>] [-SetupCompleteCommand <string[]>]
Servicing Package	[-ServicingPackagePath <string[]>]
Remote WinRM access	[-EnableRemoteManagementPort]
Debug and/or Enable Emergency Management Services (EMS)	[-DebugMethod {Serial Net 1394 USB}] [-EnableEMS] [-EMSPort <byte>] [-EMSBAudRate <uint32>]

Installation – Voraussetzungen

- Treiber
- Administrator password
- Deployment Type
- Edition

Installation - Optional

- Add server roles or features
- Computer name
- IP address
- Domain join
- VHD/VHDX size
- Unattend and/or Setupcomplete
- Remote WinRM access

Installation – Rollen und Features

- OneGet PowerShell – Repository
 - Install-PackageProvider NanoServerPackage
 - Import-PackageProvider NanoServerPackage
- Arbeiten mit dem Repository
 - Find-NanoServerPackage
 - Save-NanoServerPackage
 - Install-NanoServerPackage

Installation Agents und Tools

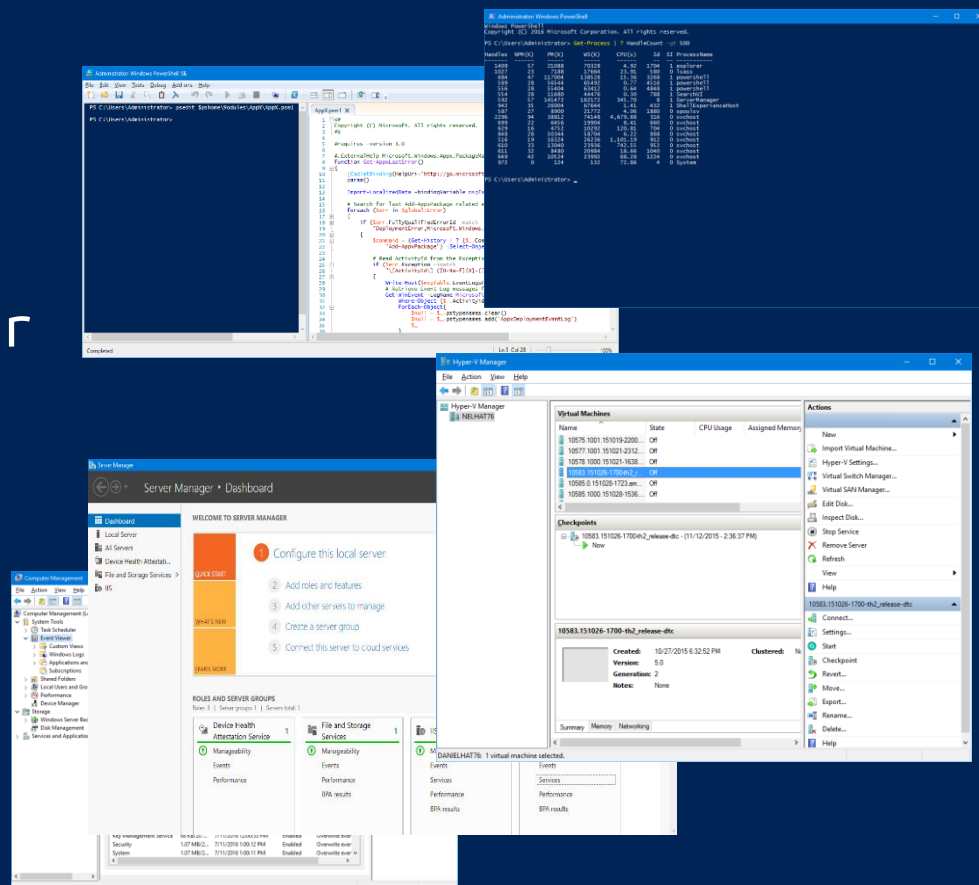

- Kein MSI
- Kopieren von Files über Share / PowerShell Copy-Item -ToSession
- Windows Server App (WSA) installer
 - Install
 - Uninstall
 - Inventory

Management

- Kein GUI
- Remote Management
 - PowerShell Core
 - WMI
- PowerShell DSC
- DevOps (Chef,Puppet..)

Remote Management Nano Server

- Server Manager
- Hyper-V Manager
- PowerShell Core
- Failover Cluster Manager
- PerfMon, Event Viewer, etc.
- Server Management Tools (SMT)

Bereitstellung von Container

Bereitstellung von Container

Bereitstellung von Container

Windows vs Hyper-V Container

- Windows Server Container teilt Kernel mit Container Host und allen anderen Containern.
- Hyper-V Nicht

Docker 101

Basis Befehle

Docker info

Docker pull

Docker images

Docker run

Docker ps

Docker Stop

Docker rm

Docker run

Details

```
Docker run <image>
```

```
Docker run -- name =<customname> <Image>
```

```
Docker run -- rm <image>
```

```
Docker run -- d <image>
```

```
Docker run -- d -it <image>
```

```
Docker run -- d -p 4000:4000
```

Demo

PSConf2017 Rockz

Scripts warden zur Verfuegung gestellt

Start-Demo | Keep-Calm

Zusammenfassung

- Ressourcen schonend
- Einfach zu Verwalten
